SUMMARY

Industrial Engineering student with manufacturing experience seeking a summer 2026 internship opportunity focused on lean manufacturing, controls and systems engineering, automation engineering, industrial systems optimization or quality engineering. Experienced in manufacturing operations, process documentation, tooling design, and cross-functional team collaboration with proven results in process improvement initiatives. Understanding of continuous improvement principles such as Kaizen, Poka-yoke, and Lean methodology. Versed in root cause analysis tools such as the Fishbone diagram and 5 Whys technique.

EXPERIENCE

Click Bond Inc., Carson City, NV

May 2025 - December 2025

Manufacturing Engineering Intern

- Attended MRB (Material Review Board), witnessed cross functional work dispositioning discrepant material.
- Worked well with little oversight and asked questions from the engineering team when I needed help.
- Implemented company-wide standardization of documents, gaining intimate knowledge of process operations.
- Revised and updated previously existing standards for automated silicone fixture washing process.
- Created 10 new work instructions for post paint operations, fixture hand washing, and Gluco de-flash processes, reworked 4 additional existing work instructions for processes entrusted to me.
- Utilized Excel to compile time-based data on efficiency of automated assembly machines.
- Identified critical documentation deficiencies and process inefficiencies in active manufacturing operations, digitized reference batch settings in Excel to eliminate the risk of losing a decade of data. Developed and launched an automated, continuously improving reference system, generating ~\$2,430 in annual cost savings.
- Designed and manufactured a custom shop vac nozzle for ergonomics and packaging throughput improvement.
- Completed an iterative drawing process, taking my SolidWorks conveyor bracket concept to a machinist and getting the part fabricated. Drafted and manufactured numerous SA (Surface Analysis) testing fixture tools with critical dimensions, helping gather more accurate SA testing data and provide a more stable platform for tests.
- Operated a CNC machine for ~10 hours and learned to use a drill press. Installed, set up and used 3D printers.
- Collaborated primarily with the Manufacturing Engineering team, often with R&D and QA teams.
- Balanced school and work throughout Fall '25 semester at University of Nevada, Reno.

UNR Residential Life, Reno, NV

March 2024 - December 2025

Resident Assistant

- Emergency and first response point of contact; communication, teamwork and coordination skills.
- Construct and uphold a micro-community on the floor, encourage and motivate residents.
- Programmed, promoted and executed events. Tabulate, prepare, and submit data; verbal, written or digital reports as work is performed daily.

City of Irvine Aquatics Lifeguard, Irvine, CA

February 2021 - August 2024

EDUCATION

University of Nevada, Reno

Expected Graduation: May 2028

- Bachelor of Science: Industrial Engineering, Minor in Mathematics. Dean's List Fall 2025.

Related Courses and activities:

- Industrial and Systems Engineering, Physics 1-2, Statics, Graphics, Calculus 1-3, Statistics, Linear Algebra.
- Risk Management Chair, Theta Tau – Rho Delta Chapter; a Professional co-ed Engineering fraternity.

PROJECTS AND PREVIOUS EXPERIENCE

- Built a fitness tracking AI Agent using Voiceflow, Make.com, and Excel. It sorts input into Excel to map fitness progression.
- Locally hosting LLM's using LMStudio and Llama

SKILLS AND ABILITIES

- Technical Skills: SolidWorks, AutoCAD, Aras Innovator (PLM), Epicor (ERP), Python, LabView, RStudio, and Microsoft Office. Self-taught in AI hosting/LLMs (LMStudio). Operational knowledge of Fanuc Cubic CNC machines, Keyence machines, extensive knowledge of 3D printing and modeling. Insight, Cura, and Orca Slicers. Soldering experience.
- Soft Skills: Excellent communication; both verbal and written. Cross team collaboration, Root Cause Problem Solving, Public Speaking, Leadership, Conflict Resolution and Crisis Management, Analytics interpretation.
